

# ASINEX Gold & Platinum, Elite and Synergy

---

## ASINEX Gold & Platinum

23 000 cpds, provides diverse and cost-effective coverage of drug-like chemical space. The majority of compounds have a high degree of drug-likeness, in accordance with Lipinsky´s Rule of 5.

## ASINEX Elite & Synergy

25 000 cpds, contain lead-like compounds that has been screened against early ADMET tests (including DMSO and water solubility, PAMPA, PGP and CYP inhibition) to make sure screening hits are devoid of potential ADMET problems and are amenable for rapid hit-to-lead optimization.
